360° Infiltration Experience

OBJECTIVES

Participants will receive all the information needed to perform both blind and ultrasound-guided infiltrations with Sinovial (linear HA), Sinovial HL and Sinogel (Hybrids complexes, H/L-HA), including diagnostic tips, basic US training and an overview on the main characteristics and MoA of HA.

The final objective of the course is to increase confidence for the use of ultrasound for delivering Sinovial products and provide insights on the use of them for the treatment of OA.
