OBJECTIVES

Participants will receive all the information needed to perform both blind and ultrasound-guided infiltrations with Sinovial (linear HA), Sinovial HL and Sinogel (Hybrids complexes, H/L-HA), including diagnostic tips, basic US training and an overview on the main characteristics and MoA of HA.

The final objective of the course is to increase confidence for the use of ultrasound for delivering Sinovial products and provide insights on the use of them for the treatment of OA.

3rd June 2025

IRCCS Galeazzi - Sant'Ambrogio Hospital, Milan

SESSION 1: PRECEPTORSHIP AND LEARNING

- 09.30 Welcome and introduction
G. Filippou, L. Sconfienza, IBSA HQ
- 09.45 The HA world by IBSA: from evidence to clinical practice
IBSA HQ

SESSION 2: CLINICAL ASPECTS OF OA

- 10.30 Utility of US in OA: assessment of severity and differential diagnosis
S. Sirotti
- 10.50 US guided vs blind injections
Z. Karim
- 11.15 COFFEE BREAK
- 11.30 Sonoanatomy for US guided injections of shoulder, hip, knee and I CMC joint
L. Coronel
- 12.00 Hyaluronic acid injections in degenerative and traumatic conditions
F. Valli
- 12.30 Discussion
- 12.45 LUNCH
- 13.45 Live demonstration on patients: US guided injections
G. Filippou, L. Sconfienza, S. Sirotti
- 15.15 General questions and answers
- 15.45 Conclusions

4th June 2025

M.A.R.C. Institute - MultiMedica Cadaver Laboratory, Milan

HANDS ON SINOVIOL AND SINOGEL AND PRACTICE

- 09.30 Introduction
G. Filippou
- 09.40 HANDS ON:
Blind injections and US guided injections (in plane and out of plane).
Anatomical pieces (shoulder, hip and knee) - Groups, 3 tutors
L. Coronel, G. Filippou, Z. Karim, L. Sconfienza, S. Sirotti
- 11.00 COFFEE BREAK
- 11.30 HANDS ON:
Blind injections and US guided injections (in plane and out of plane).
Anatomical pieces (shoulder, hip and knee) - Groups, 3 tutors
L. Coronel, G. Filippou, Z. Karim, L. Sconfienza, S. Sirotti
- 12.45 Conclusions and take home messages
- 13.00 LUNCH

The background of the entire page features a light blue sky with soft clouds. Overlaid on this are three anatomical illustrations of human joints: a knee, a shoulder, and a hip. These illustrations use a color gradient from blue to red to yellow, indicating areas of inflammation or pain. Two large, dark blue curved arrows, one at the top left and one at the bottom right, frame the central text.
